# Agriculture

Killing insects is insufficient, when it comes to maintaining a safe and pest-free environment for crops. Biovectrol ensures that crops stay healthy and are safe for consumption.

- **Farmer and consumer friendly**
  - Very Low Toxic Level (LD50 > 42,800mg/kg)
- **Holistic approach**

Comprehensive and total treatment for seeds, soil and plants against:

  - Pests including Root-Knot Nematode
  - Ova and Larvae
  - Fungi
  - Diseases: Contact & Systemic
- **Improved quality and yield:**
  - Raises farmer incomes and living standards
- **Eliminates high toxic residue in products**
  - Eliminate sickness associated with high toxic chemicals
  - Promote healthy and wholesome life
- **Organic and non-organic approaches**

# Commercial Sanitation & Public Health

It is a known fact that we live in a world of bacteria. Biovectrol provides a total solution by maintaining a healthy environment for all.

- **Effective against germs and bacteria:**
  - Salmonella Enteritidis phage type 4
  - Salmonella Typhimurium
  - Salmonella choleraesuis
  - Escherichia coli
  - Escherichia coli O157:H7
  - Pateurella multocida
  - Pseudomonas aeruginosa
  - Antinobacillus pleuropneumoniae
- **Does not stain the surroundings**
- **Applicable across all industries such as:**
  - Residences, condominiums and apartments
  - Community halls and religious gathering places
  - Schools and education centres
  - Hotels and restaurants
  - Offices and Factories
  - Transportation including land, sea and air
  - Off-shore oil rigs
  - Military areas
  - Parks and zoos
  - Disaster Recovery
- **Effective total solution at lower cost**
